

WALSH BISHOP

LANDSCAPE STRUCTURES

Location: Delano, Minnesota

Project type: New Construction

Services: Architectural and interior design services

Size: 30,000 sf

Completion: 2003

The international headquarters of this producer of outdoor play equipment for children consists of a 30,000 square foot addition to an existing manufacturing facility. The two-story building has a 17,000 square foot footprint. Restrained use of materials characterizes the exterior building, creating a neutral container for the interior, which presents a series of colorful, dynamic, and vibrant objects. One such object is a stair cylinder, "pulled out" from the building to mark the entry and the building identity.
